

## *Installing Sonic Pi on Mac*

The first time you open Sonic Pi on your Mac, you will need to give it permission to run.

**This is a simple 4 step procedure...**

After you have done this just once, you will then be able to open Sonic Pi normally.

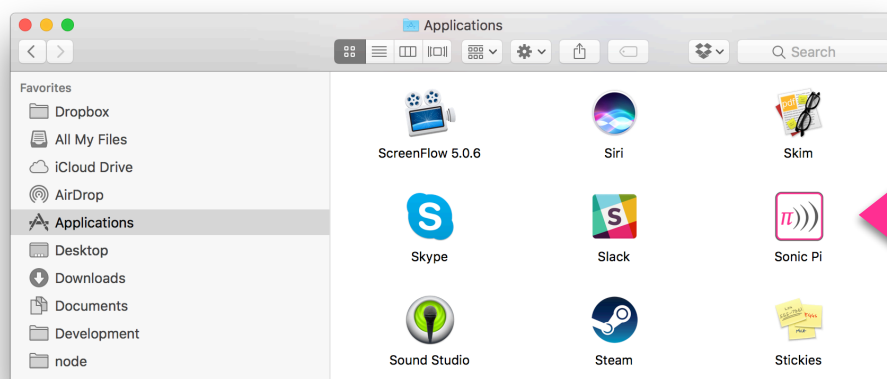

## Step 1

*Drag the Sonic Pi icon into the Applications folder:*

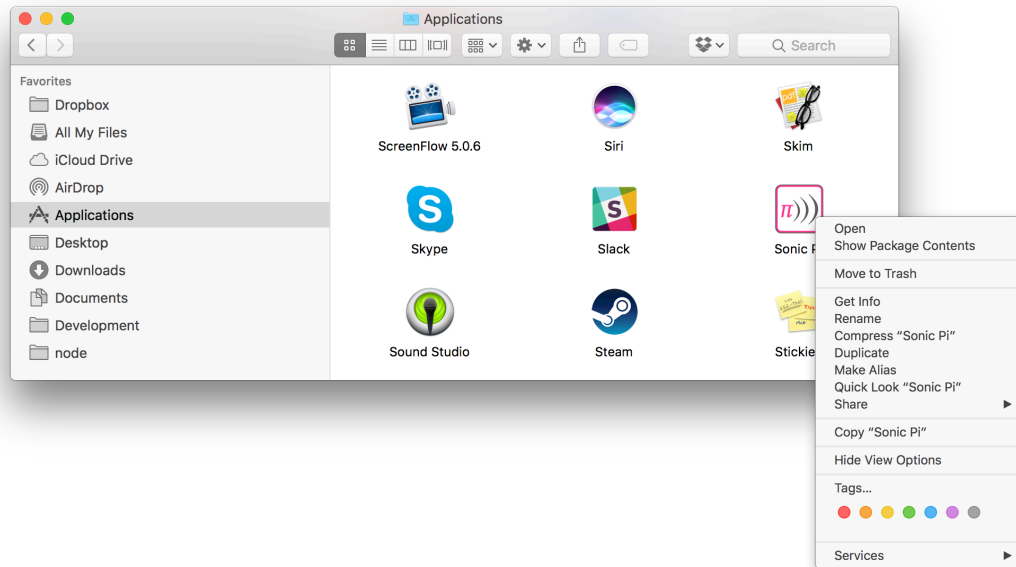

## Step 2

*Open the Applications folder in Finder & find Sonic Pi:*

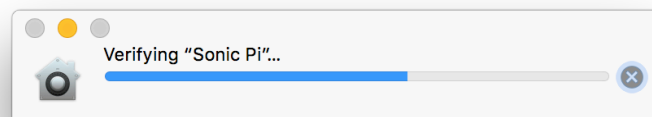

## Step 3

Hold **ctrl** on the keyboard and click the icon to reveal the menu. Select **Open**.

Wait for the app to be verified...

## Step 4

Finally, choose **Open** in the following window:
